ASTE/C/SUR

Sub: System Improvement.

.....

The following System Improvement is suggested against Security of Railway Materials issued to contractor for installation in the section.

"Engineer in-charge of work i.e. Dy.CSTE(C)/ DSTE(C)/ ASTE(C) should fill up the space in Contract Clause specifying the amount of material BG/Indemnity Bond while signing the C.A. He should also ensure that information of material BG/Indemnity Bond submitted by contractor is communicated to SSE/Store or Consignee with proper acknowledgement".

It is suggested that the Field Unit should take the Indemnity Bond of the value equivalent to supply of materials to the contractor. In no case, the value of materials issued to Contractor should exceed the value of Indemnity Bond
