**Sub: Commissioning of M&Ps**

One of the M&Ps was supplied against COFMOW contract and commissioned in a division of Central Railway. The consignee without referring to the COFMOW contract has assumed that time allowed for its commissioning was 90 days and mentioned the same finally in Prove out Test Certificate as well whereas as per COFMOW Contract time allowed for commissioning was only 30 days.

Factually the commissioning of the machine was delayed by more than a month than the allowed time, for that a penalty of 4% was to be levied as per the relevant clause of the contract however no penalty was imposed upon the supplier and finally a clear Prove out Test Certificate was also issued. The lapse came to the notice during a subsequent vigilance check.

It may please be noted by all the consignees that the terms & conditions of the contract are properly gone through while dealing with procurement, receipt, commissioning and PTC of the M&Ps and the followings are adhered to in case of delayed commissioning:

- LD is imposed on supplier
- In case LD is not imposed adequate justification for that is recorded.
