

Mechanical department (Coaching and Freight as well as Diesel loco operation) of Nagpur division is headed by Sr. Divisional Mechanical Engineer.

'Buland' – Diesel loco at Nagpur station

Mechanical department of Nagpur depot deals with the preventive and break own maintenance of Coaching stock, Freight stock and Diesel locos. In addition, In motion weigh bridges (owned by railway), WILD (Wheel impact load detector) and fuelling points are also being managed by us.

Given the unique topography of Nagpur division, depots and working points are located at strategic locations to cater to the traffic. Details are given in activities.
