

Generally known as the lifeline of Mumbai, the local trains are the part and parcel of every Mumbaikar's life. To keep track of thousands of such trains, their schedules and routes, live status, platform numbers, arrivals, departures and delays, was a long, hectic and herculean task. The lakhs of daily commuters needed real-time information and tracking of these trains so as to plan their journey in a convenient way.

While considering the issues faced by the masses, Central Railways Mumbai Division finally decided to produce a one-stop solution to all the problems.

YATRI- Official Mumbai Local App by Indian Railways, a mobile app designed to provide the live location, updated timetable, live announcements and various other train related services. The goal was to give the user a friendly experience in terms of live update of trains, next or previous station locations, A to B commute planning and many useful features. Yatri is also integrated with UTS app for booking tickets. The convenience and comfort of the hard-working commuters was kept in mind, all the way through the designing process. And one on fortunate day, the live location tracking feature was launched on 13-Jul-2022. Since then, YATRI has been successful in making its way through lakhs of users who have eased their travelling experience to a greater extent.
